Yes, David Meyer received an award with R4 on the Implementation of the Sustainable Materials Management Tool and Pilot with Georgia Stakeholders.

Regarding Gold King Mine, we have provided a list of researchers for potential collaboration on development of a long-term monitoring plan (groundwater, drinking water, surface water, and sediment). However, we have not been tasked with any work to date.

Thanks

Hi Kelly, couple of questions from Cindy on the weekly report...

1. Were there additional NRMRL recipients of RESES awards? Frank reported that Gayle Hagler and Richard Baldauf were selected. Cindy thinks there are more.
2. Any support provided for the Gold King Mine?

Thanks!

Char

Subject: Weekly Report Comments

I finally got my email back. Both my phone and remote access were down.

Attached are my comments on this week's weekly report.

Nonresponsive

Some items can be deleted as they were in last week's report and 2 of them were included in ORD's report to the Administrator.

I have also identified items to be considered for addition:

RESES – were any other NRMRL projects awarded? I understood from discussion at Monday's meeting there may have been. Please check and include if so.

Check with Tom and Chris N. for an update on the visit of MU grad students to the Streams Facility this week.

Check with Kelly for updates, if any, on our involvement in Gold King Mine.

Since the Focus on the Farm event occurred, check with Chris regarding how it went and for any updates.

Finally, I have made some edits to the attached.

Thanks,

Cindy
